Summary

Frontend Developer with 1+ years of hands-on experience in designing, developing, and maintaining web applications. Proficient in React.js, Adept at creating responsive, high-performing applications with a focus on clean, scalable code.

Education

- **Chatrapati Shivaji Maharaj Institute Of Technology**, Panvel, Raigad, Maharashtra
Bachelor of Engineering in Computer Science July 2021 – June 2024
- **Anjuman-I-Islam Kalsekar Polytechnic**, Panvel, Raigad, Maharashtra
Diploma in Computer Engineering July 2018 – May 2021

Work Experience

- **Front-End Developer** Bharat Intern — August 2023 – October 2023
 - **Project I** : optimized key pages for an e-commerce platform using HTML , TailwindCSS and JavaScript ;
 - **Project II** : Revamped and enhanced essential web pages for Tuition Website in JavaScript, CSS3, and HTML to create a dynamic and engaging tuition website. With a passion for JavaScript and a keen eye for design, I leveraged these technologies to craft intuitive user interfaces and interactive features that enhanced the overall user experience. This experience not only deepened my understanding of front-end development but also fueled my enthusiasm for crafting seamless and visually appealing web solutions.
- **Front-End Developer Intern** HasbaSoft PVT LTD, Remote — June 2021 – October 2022
 - Collaborated on multiple client projects, designing responsive home pages and integrating REST APIs.
 - Enhanced front-end performance to improve user experience and site speed.
 - Developed and integrated RESTful APIs with MongoDB for data storage; reduced data retrieval time by 60% and boosted overall application efficiency by 35%.
 - Leveraged MongoDB services for data storage and application hosting.

Projects

- **E-Commerce/Website** MERN Stack :
 - Designed a MERN stack-based micro-service application.
 - Developed 5 microservices, improving system scalability by 50%, handling 10,000 concurrent users with zero downtime.
 - Built a client application using React.js, increasing user satisfaction by 30%, reflected in user surveys..
 - Integrated JSON Web Tokens (JWT) for secure authentication, enhancing security protocols and reducing unauthorized access attempts by 40%, with zero security breaches reported.
 - Deployed scalable services using Github, leading to a faster deployment cycle.
 - Integrated Stripe for payments and used Jest for testing, achieving 80% test coverage.
 - Used Kafka for event-driven architecture, handling 5,000 events per second, and GitHub Actions for CI pipelines, reducing manual integration efforts by 50%.

Technical Skills

- **Languages**: HTML, CSS3, JavaScript, Figma, Java(Beginner Level)
- **Technologies**: React.js, Express.js, Redux, RESTful APIs, Git, Github, MERN Stack
- **Databases**: MongoDB
